PRODUCT DESCRIPTION

AQURON[®] Lake-Save[™], is a clear blue aqueous borne solution / treatment for the purification of lakes, ponds, and reservoirs and the enhancement of fish and plant life.

BASIC USE

AQURON[®] Lake-Save[™] is an extremely effective product. **AQURON[®] Lake-Save[™]** is completely soluble in water, and because it alters the nature of water, several important events take place in any pond or lake. The primary event that occurs is that it rapidly replenishes the supply of both oxygen and hydrogen by weakening the bonds in the well-known H₂O (water) formula. By a transferring of electrons from oxygen in solution, it accelerates the oxidation-reduction process in which both oxygen and hydrogen are needed. It will also help to control pH and will help to purify the water by lowering the BOD (biochemical oxygen demand).

AQURON[®] Lake-Save[™] will rid ponds and lakes of unsightly algae, which will also rid the ponds and lakes of annoying odors. The water will become cleaner, fresher, and odor-free.

AQURON[®] Lake-Save[™] is safe to use in lakes and ponds containing fish. It will actually keep your fish healthier and livelier due to a slight hydrogen boost. A fish hatchery in the United States adds one tablespoon to each 20 gallons of tank water when they ship trout and other fish. This is a ratio of 1:7000 and is considerably more than is needed to clean up ponds and lakes, but is given to show that it is very safe to use with fish.

SOME ATTRIBUTES

- Ecologically Safe
- Environmentally Safe
- Eliminates noxious odors
- No VOS/VOC content
- Virtually non-toxic
- No hazardous fumes
- Efficient and Economical
- Improves fish health
- Fish are livelier
- Reduces phosphates
- Reduces nitrates
- Raises free oxygen levels
- Works to remove algae
- Easy to utilize
- Starts immediately to impart attributes
- Cost, time and environmentally effective
- Unused product carries a 5 year shelf life (provided containers are properly sealed and stored)

PRECAUTIONS

- Always use prudent laboratory or industrial hygiene procedures.
- Wear goggles, rubber boots, rubber gloves and rubber apron during use.
- If eye contact is made, flush with copious amounts of potable water or eyewash. If redness persists, seek medical attention.
- Contact with skin can cause redness. If contact is made with skin, immediately wash with potable water and mild soap.

COMPOSITION

AQURON[®] Lake-Save[™] is a clear blue aqueous borne solution/ treatment comprised of organic supplement and a catalytic agent.

TREATMENT/APPLICATION

*Various treatment programs can be utilized to effectively introduce **AQURON[®] Lake-Save[™]** to enhance water quality and remediate ponds, lakes and waterways which have deteriorated due to contamination from numerous sources. The most cost efficient and reliable long-term result will be achieved by **AQURON Environmental Services** selecting the*

TREATMENT/APPLICATION CONT...

most appropriate method for the area (and volume) to be treated and protected.

1. **INITIAL TREATMENT** - Using two (2) U.S. gallons of AQURON® Lake-Save™ dilute with 20 gallons of potable or lake water and spread over surface of lake by spraying over lake's surface.

2. **SECOND TREATMENT** - After one (1) week from previous treatment, repeat application as directed in step one (1).

3. **THIRD TREATMENT** - Wait two (2) weeks from previous treatment and repeat application as directed in step one (1).

4. **FOURTH TREATMENT** - Wait two (2) weeks from previous application and repeat application this time using one (1) gallon of AQURON® Lake-Save™ diluted with twenty (20) gallons of potable or lake water and spray apply as stated above.

5. **FIFTH TREATMENT** - Wait two (2) weeks from previous application and repeat as in treatment #4.

6. Following fifth treatment only an occasional half (1/2) to one (1) gallon treatment needs be spray applied as needed to maintain results for several months.

7. Please call our technical department for various application procedures since all bodies of water differ in volume and type of contaminate.

***Note:** Use of pumping equipment to circulate lake water after treatment with AQURON® Lake-Save™ will accelerate desired results.

CLEAN-UP AND SAFETY

All equipment will clean easily with potable water.

SHELF LIFE

Shelf life is 5 years provided product is maintained in original containers with lids tightly sealed.

PACKAGING

AQURON® Lake-Save™ is available in 5 gallon/19.4 liters, 55 gallon/213.4 liter.

AQURON® Lake-Save™ also available in bulk containers.

AQURON® Lake-Save™ Remedial Program is available from AQURON Environmental Services as a complete treatment system with ongoing monitoring to ensure the desired results are achieved and maintained.

The product is otherwise only available for dosing water strictly according to the directions and requirements of an approved representative of AQURON Environmental Services.
